ABOUT ME

Operator-led buyer focused on acquiring and operating enduring, cash-flowing small businesses in Colorado Springs and the Mountain West. I bring a combination of: over 10 years of experience in building and maintaining operational systems, hands-on business ownership, and leadership in high-pressure, real-world environments. I approach acquisitions as an operator first not as a financial engineer. My focus is simple: keep the business running, protect what works, and build from a stable foundation.

EDUCATION

Master's in Computer Science
Colorado Technical University

Bachelor's in Computer Science
Colorado Technical University

ACQUISITION APPROACH

Focused on long-term ownership of durable small businesses. Hands-on during the first 30–90 days to stabilize and document operations, while maintaining structured transition plans. Emphasizes continuity, execution, and preserving what already works rather than unnecessary disruption.

DEAL READINESS

Actively working with SBA lender (Live Oak Bank) and pursuing acquisitions within the next 3–6 months. Target equity investment range of \$60k–\$90k. Focused on straightforward, executable deals with realistic expectations and strong alignment between buyer and seller.

EXPERIENCE

BITWAY, LLC
OWNER / OPERATOR

Established and operated an e-commerce business generating approximately \$250k in revenue within the first six months. Managed end-to-end operations including supplier sourcing, pricing strategy, inventory management, fulfillment (Amazon FBA), and customer satisfaction. Achieved 200–400 orders per day at peak across roughly 12 SKUs. Developed internal tools to track sales performance, demand trends, and inventory levels while navigating real-world operational challenges.

PLANET DDS
SOFTWARE ENGINEER

Core contributor on a production, revenue-generating platform. Maintained and enforced release processes, operational checklists, and deployment discipline to ensure consistent execution. Built automation systems to reduce errors and improve reliability across environments. Trusted with production systems and operational ownership.

FISERV / BOEING / HARRIS
SOFTWARE ENGINEER

Developed systems supporting financial reporting, operational workflows, and large-scale decision-making. Contributed to building and maintaining reliable software in both Agile and sustainment environments. Mentored team members, enforced code quality standards, and improved overall execution through documentation and process discipline.

U.S. ARMY
INFANTRY TEAM LEADER

Led small teams during deployment operations, ensuring readiness, accountability, and execution under pressure. Responsible for coordination, positioning, and operational effectiveness in high-stakes environments where reliability and discipline were critical.
